

List of materials, Beckert

clay course (TERRA 104) will be pre-ordered from Boesner for everyone. 2 hubel for each participant. The clay will then be delivered to the academy. Bring your own modeling tools. For those who don't have any, I will bring new, useful tools that can be purchased from me. If you have one, please bring a sturdy wooden disc (no IKEA wooden turntables or similar). If possible, a picture of the idea of what is to be modeled. A sturdy box (e.g. folding box) and filling material for transporting your work home. The bust can be fired after about 2 months at home or at my home (Bad Feilnbach). It can only be fired if the sculpture has been hollowed out and is completely dry! It is not certain whether we will be able to hollow it out during the course or whether it will have to be done at home immediately afterwards.
